EVOLVED[®]
Love is Back[®]

Product Specifications:

Category: vibrator
User: women
Material: pure silicone + ABS buttons
Finish: matt/shiny
Size: L: 190.5 mm D: 32.0 mm
Battery: built-in Li battery
Voltage: 5V
Number of Vibrations: 8
User time: 80 - 100 minutes
Sound Level: <45DB
Maximum Heat Temperature: 107.6

USB RECHARGEABLE

Charge upon opening toy. Connect the USB cable to the USB port of your computer or other power source, and the other (DC charge) end into toy's input.

The LED light will blink red when charging, and become solid blue when fully charged. Initial charge takes about four hours.

Press on On/Off key to start. The LED light on the control panel will appear blue and the first vibration function will start. Press on the vibration button to cycle through the eight functions.

To activate the Thermal Regulation Technology, press on the heat temperature logo. The LED light will appear red, indicating that the vibrator is heating up. The vibrator will heat up within 1 minute and will reach its warmest point within about 3 minutes. Heat temperature ranges between 104 - 107.6 and will remain constant at 107.6, never exceeding 107.6.

Once the warmest heating point is reached, the LED light will alternately blink red and blue. To de-activate the heating, press on the heat temperature logo again. The LED light will appear blue.

Charge lasts from 80 - 100 minutes, depending on frequency of use. Toy will get weaker as battery power depletes.
