**ZERO TOLERANCE**

**Product Specifications:**

- Material: ABS plastic, TPE rubber
- Battery: Polymer cell, 600mAh
- Voltage: 3.7V
- Number of Vibrations: 7 vacuum and evacuation
- User time: 40 mins on high
- Sound Level: Less than 60db

**CHARGING INSTRUCTIONS**

This vibrator arrives with a partial charge, so it recommended to charge it fully before first use. Connect the USB plug into the USB port of your computer or other output and the other end of the DC charger into the toy's cable port located at the toy's base. The battery will charge fully in about two and a half hours. The indicator light will flash while device is charging and remain solid when toy is fully charged. There is no danger of battery damage by overcharging, but it's recommended not to overcharge for long periods of time. Charge lasts for about 90 minutes of play time with the lowest level of vibration, and 40 minutes with the highest level of vibration. This toy operates at a sound level of less than 60db and a voltage of 3.7V with a 600mAh lithium battery.

**INSTRUCTIONS FOR USE**

This toy has a five-button control panel on its handle, 1-5 starting from the top. To turn the toy on, press the Power Button (button 1) for at least three (3) seconds. The buttons will light up, and vibration will begin at its lowest speed. Once the toy is powered up, change the vibration speed by pressing the Vibration Button (button 2). Each press will advance to the next speed or function for a total of seven (7). To activate the sucking function motor, press the Sucking Button (button 3) once. Press it again to cycle through seven (7) sucking modes, including off. To activate the evacuation function which releases vacuum pressure immediately, press the Evacuation Button (button 4) for as long as desired to release air continuously. The evacuation function only works while the vacuum function is engaged. The Max Power button (button 5) gives a boost of maximum vacuum power and evacuation simultaneously. Press the button to engage the max power, then press again to disengage. To turn the toy off, press the Power Button (button 1) for at least three (3) seconds. The LED light will go dark, and all vibrations and functions will stop.

**CLEANING INSTRUCTIONS**

There are two ways to clean the Squeeze Play:

**WITH THE EVACUATION TUBE:**

1. Place the included clear plastic Evacuation Tube into the evacuation hole at the back of the toy's handle (opposite side from the control panel)
2. Then press the buttons on the control panel in the following sequence: Power button (vibration button will also light up), Sucking Button (Evacuation Button will also light up). Then turn OFF the Vibration Button, leaving just the 1st, 3rd and 4th buttons lit.
3. Place the toy stroker end down into a sink or basin of clean water, control panel down - this allows water to cycle through the interior of the toy and spout out through the plastic evacuation tube. Let the water cycle for about two minutes to make sure the chamber is clean.

**BY OPENING CHAMBER:**

1. Twist and pop the handle off the stroker in one motion.
2. Press your thumb into the bottom of the stroker to pull the chamber apart.
3. Clean the chamber with soap and water, rinsing thoroughly.
4. Let parts dry and reassemble.

**USB RECHARGEABLE**
